

COVID-19 Risk Assessment Borough High Street Site

INITIAL ASSESSMENT DATE: 13/08/2020

UPDATES: 17/09/2020, 13/10/2020 V2.1, 24/11/2020 V3.0, 13/05/21 V4.0

LOCATION: 275 Borough High Street, London, SE1 1JE

COMPLETED BY: Steven Vogel, Deputy Vice Chancellor (Research)

Context

This risk assessment applies to the Borough High Street (BHS) site. A separate risk assessment has been completed for Clinical Services and related procedures delivered at the BHS site from 30/11/2020 and reviewed with relocation of clinical services to BHS. This risk assessment should be read in conjunction with the operational guidance and policy “UCO use of Borough High Street Building and clinical services Policy and Guidance COVID-19- Staff-Students 16-05-2021 1.5 Final” which is available for download here: <https://www.uco.ac.uk/life-uco/coronavirus-COVID-19>. This guidance and policy has been disseminated to staff and students. It has been amended in light of feedback prior to its initial implementation and subsequently further amended in response to changing circumstances and further guidance. In addition, a link to the guidance has been included in the footer of emails from all staff at UCO.

The risk assessment aligns with the expectations of the working safely during coronavirus (COVID-19) <https://www.gov.uk/guidance/working-safely-during-coronavirus-COVID-19> and the Health and Safety Executive guidance <https://www.hse.gov.uk/coronavirus/working-safely/risk-assessment.htm>. Additional guidance relevant to Higher Education and community based clinical and osteopathic care has also informed this risk assessment. The risk assessment is kept under close review and amended in response to new guidance as it is issued and in response to experience of use of the facilities.

Key objectives

Carrying out and applying the controls identified in this risk assessment and the associated operational guidance and policy aim to make the BHS site COVID-secure for work, study and for those visiting and using the building.

Those at risk

UCO staff

UCO students including Continuing Professional Development (CPD) delegates

Visitors to our premises

Cleaners

Contractors including those delivering CPD on behalf of UCO

Delivery drivers

Vulnerable groups – Older adults, pregnant workers, those with existing underlying health conditions

Risk ownership

Where possible an individual role has been attributed to the identified risk. However, for controls to mitigate many of the risks, there are expectations for groups of people. In some instances, a risk owner has been identified for controls where it has seemed appropriate.

Hazard overview

This risk assessment focusses on hazards relating to the spread and infection with COVID-19 through contact and airborne transmission.

Control key measures

Individual risk assessment

Infection control processes

Occupancy level reduced

Social distancing

Ventilation

Use of face coverings and PPE

Asymptomatic testing

Vaccination

Summary scoring of risk

Risk scoring broadly aligns with the UCO's Risk Management Policy.
